Works further comprise the testing, commissioning and operation of the new wastewater treatment plants.

1.3. Lot 3

The works comprise the design and construction of Local Service Centres in Baghdati and Vani.

2. Project implementation

The Lots shall be implemented based on FIDIC Conditions of Contract for Plant and Design Build (“FIDIC Yellow Book”), First edition 1999. Procurement of the works contract shall follow current KfW Guidelines for Procurement (January 2021).

The design and the works have to comply in full with national regulation, this applies particular for effluent requirements. The Contractor shall comply with Georgian legislation.

It is encouraged that the Contractor subcontracts parts of the works to or enters into a joint venture with local contractors. The overall responsibility shall in any case remain with the Contractor.

The “design and build” contract includes all civil, piping, electromechanical works which area necessary for the proper operation and maintenance of the treatment plant as well as the commissioning of the plants.

3. Construction Period(s)

3.1. Lot 1

The Time for Completion shall be 36 months (6 months for design + 30 months for construction) followed by a 12 months Defects Notification Period.

3.2. Lot 2

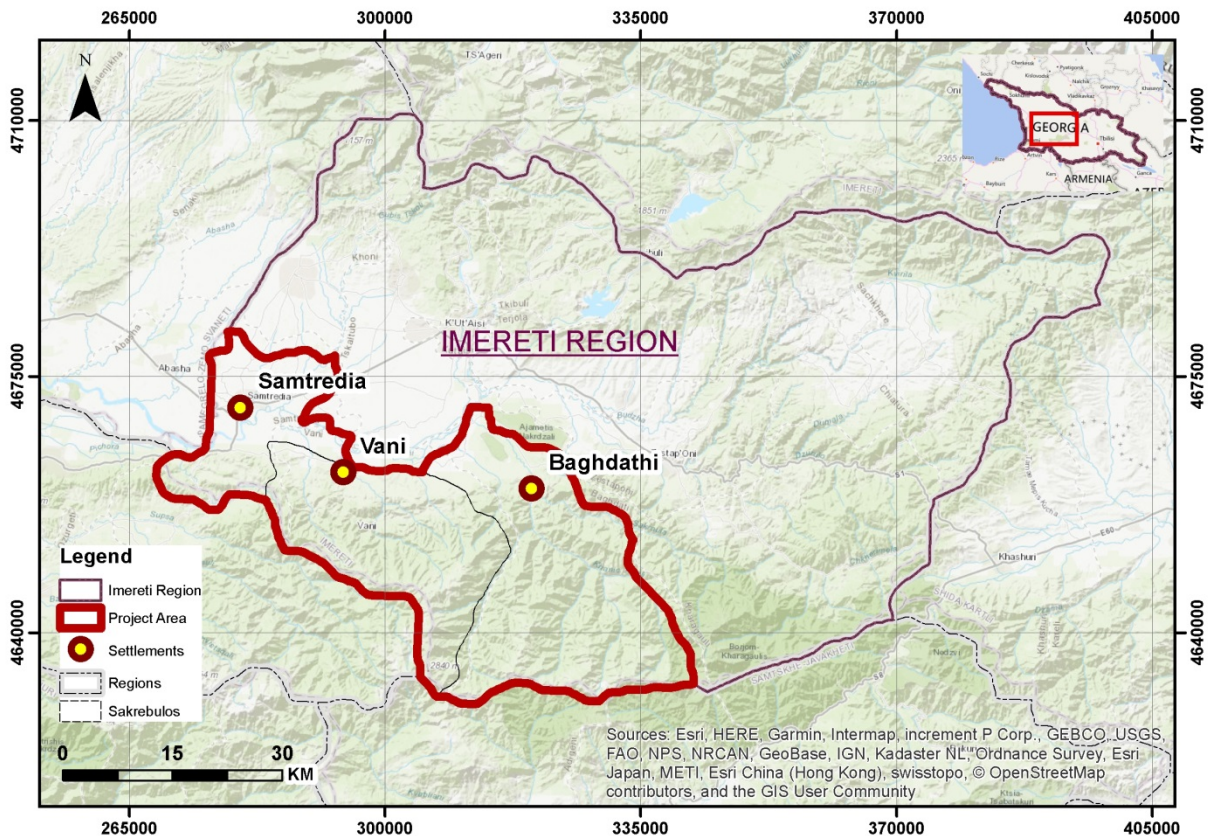

The Time for Completion shall be 30 months (6 months for design + 24 months for construction) followed by a 12 months Defects Notification Period.

3.3. Lot 3

The Time for Completion shall be 24 months (6 months for design + 18 months for construction) followed by a 12 months Defects Notification Period.

4. Site and other Data

The region of Imereti is one of the Central Western Provinces of Georgia. The project municipalities Vani, Samtredia and Baghdathi are located in Imereti Region between the lower foothills of the Lesser Caucasus and the left bank of the Rioni River Basin.

The Imereti Region is rich in cultural and architectural monuments with historical value and many natural sites, which however are not yet developed to be included into the main tourist routes of the region / country. The urban areas (and main focal points of the project)

are still marked by the legacies of the Soviet period, economic opportunities are still scarce and infrastructure is still in need of modernization. The rural areas of the project area are still largely dependent on (extended) subsistence agriculture, livestock rearing and the use of natural resources (e.g. forests).

Vani, a district in the south-west part of Imereti Region with its main town of the same name, is located approximately 220 km west of the capital Tbilisi. The administrative area of the Municipality has around 558 km² with 32,790 inhabitants (2018), of which the City of Vani has about 3,500 inhabitants (2018). The town of Vani is a hub for archaeological and cultural sites. The town is renowned for its archaeological remains, which are however not yet very developed as international tourism attractions. The town is located slightly off the main transportation and tourist axes. There is no direct connection to the International Kutaisi Airport by crossing the Rioni River and no direct railway link.

Baghdati, a district in the southern part of Imereti Region with its main town of the same name, is located approximately 200 km west of the capital Tbilisi. The Municipality has around 19,830 inhabitants (2018), of which the City of Baghdati has 3,400 inhabitants (2018). The town of Baghdati is located in Khanistskali Basin link to Borjomi Kharagauli NP and to Abastumani via spectacular Zekari Pass: Baghdati is located on the Northern Slope of Borjomi Kharagauli NP in an area that is not yet very touristic developed but with great potential for eco-tourism activities. Especially Khani and Sairme are former resort areas with increasing investment plans and activities.

Samtredia Municipality with its main town of the same name is located in the south-west part of Imereti Region approximately 250 km west of the capital Tbilisi and 27km west of Kutaisi (second largest city of Georgia). The administrative area of the Municipality has around 364 km² with approx. 42,200 (2022) inhabitants. Of these the town of Samtredia has 22,444 (2022) inhabitants. The city of Samtredia with its railway station, the motorway connection, and the proximity (10 km) of International Kutaisi Airport, is well located as a transport hub and constitutes the gateway to the Black Sea Coast and the region of Adjara. The rural areas of the municipality are still largely dependent on (extended) subsistence agriculture and livestock rearing.

The climate of Western Georgia is diverse and due to location changes it varies from the humid subtropical to the permanent ice zone. Average annual air temperature is 14-15°C. The average annual temperature in the mountainous areas varies between 6-10°C and 2-4°C, the absolute minimum is -30 to -35°C. The extreme temperatures are + 45°C and -15°C.

5. Environmental and Social Management Plan (ESMP)

An Environmental and Social Impact Assessment (ESIA) according to national regulation and KFW's requirements is in the status of preparation and will result in a detailed Environmental and Social Management Plan (ESMP), clearly assigning tasks to involved parties (works contractor, Employer, Engineer).

The ESMP will form an integral part of the bidding documents and works contract; the works contractor will be tasked with its further detailing to the Project Area and implementation in close coordination with the WWTP operator, the Employer, and monitored by the PEA and the Engineer.

All works shall comply with KfW Sustainability Guideline.
